Subject: Microsoft Settlement

Dear Judge:

I wish to express my opposition to the Proposed Final Judgement which would give Microsoft complete control over the Windows system.

The principles of "fair play," if that term can be applied to business, require that healthy competition in industry be allowed. How can we even think of outlawing that? I believe that Microsoft has violated antitrust laws time and time again, and now wish to be rewarded for that instead of punished.

That doesn't seem right to me! Does it to you? Please don't fail to make the most just ruling in this important case.
